

Fargo-Moorhead Metropolitan Flood Risk Management Project

*Flood Diversion Board of Authority meeting
January 14, 2016*

Corps Monthly Update

- In Town Levees
 - ▶ Continue to review designs and support construction to assure features can be incorporated into the FMM Project.
- MN DNR EIS
 - ▶ Assisting with list of DEIS public comments provided by to us by the MnDNR on January 6th.
 - ▶ Will provide responses by 29 January.

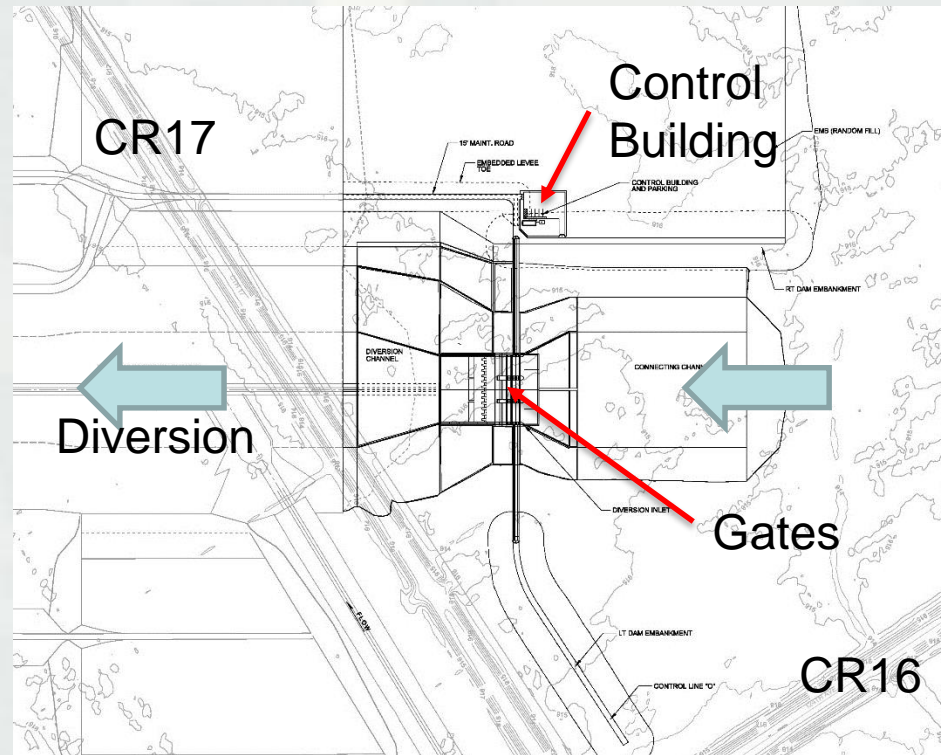

Corps Monthly Update

- Rights-of-Entry
 - ▶ Will be requesting soon for 2016 to conduct surveys, including parcels in both ND and MN.
- FY2016 Work Plan
 - ▶ FMM is eligible for New Start and construction funding but decision is pending.
 - ▶ Administration is in process of finalizing Work Plan and will likely release in February.

Inlet Control Structure Design

- Award construction contract in FY16 if Federal funding received
- Gated inlet to the diversion, located in NE corner of County Roads 17 and 16
- 3 gates, 60' wide x 40' tall each
- Footprint = 1200'x800'
- Complete design in April 2016

Project Path Forward

- Continue to support MN EIS process
- Prepare for possible Federal construction this FY
- Continue design of Southern Embankment elements, if funded
- Advance permit coordination for diversion channel and southern embankment (ex: Dam Safety Permits, 404)
