### Short-term lane closure on I-29 planned Wednesday

**FARGO, N.D.** – A short-term closure of the northbound left lane of Interstate 29 north of Fargo, near Argusville, is being planned on Wednesday, February 7, 2024, to allow crews to safely reposition concrete median barriers and clean reflective markings on the barriers. The closure will occur between mile markers 77 and 76. The closure is planned between 9 a.m. and 2 p.m. Traffic will return to normal as soon as the work is complete.

The closure is dependent on the weather and road conditions Wednesday morning.

The public's patience and cooperation are appreciated as crews complete this work.
